WORK EXPERIENCE

Project Elixir   **July,2022 – Present**
Server Manager
- Project Elixir is an after-market custom android operating system which focus on simplicity and smooth experience.
- As Server Manager I oversee website, download site and Jenkins.
    - Automated building of device roms from source via Jenkins. Now with one click sources are synced, compiled and pushed to download folder.
    - Optimized website to load faster and with better security.

Project404
 August,2022 – Present
Gerrit Admin

- Setup Gerrit for Project 404 project so they can collaborate globally with ease of use and having a proper flow through there commits to the source.

Rastventure Limited   **June,2022**
Freelancer

- Made a python script to automatically deploy a demo shopping website within few mins on premises fully automated.
- Integrated the script with their current stack so they don't have to rewrite anything for the script.

EDUCATION
